

Journal of Emerging Technologies in Accounting

Editorial Policy

The *Journal of Emerging Technologies in Accounting* is the academic journal of the Strategic and Emerging Technologies Section of the American Accounting Association. The purpose of this section is to improve and facilitate the research, education, and practice of advanced information systems, cutting-edge technologies, and artificial intelligence in the fields of accounting, information technology, and management advisory systems. The primary criterion for publication in JETA is the significance of contribution made to the literature. JETA's mission is to encourage, support, and disseminate the production of a stream of high-quality research focused on emerging technologies and artificial intelligence, applied or applicable, to a wide set of accounting related problems. JETA's objectives are to provide an outlet for studies that are:

1. Forward-looking research regarding strategic and emerging technologies and their impact on the accounting and business environments;
2. Discovery and exploratory research about technological environments, including artificial intelligence;
3. Conceptual research about the technological environment;
4. Field research of emerging and relatively new technologies;
5. Archival and retrospective studies of the life cycle of prior technologies with a focus on a historical perspective of such technologies and the knowledge that can be gained in the current and future adoption and implementation of emerging technologies; and
6. Integrative plans for introducing, managing, and controlling emerging technologies in all areas of accounting (audit, financial, cost, tax, etc.), including practice and curriculum issues.

SUBMISSION OF MANUSCRIPTS

The following guidelines should be followed for submitting manuscripts:

1. New manuscripts are submitted using the Manuscript Submission and Peer Review System, at <https://www.editorialmanager.com/jeta>. Revisions with a manuscript number less than JETA-2019-500 are resubmitted at <http://jeta.allentrack.net>. Both sites contain detailed instructions regarding the preparation of files for submission. To ensure anonymous review, the title page is submitted as a separate file from the manuscript text.
2. Manuscripts under consideration by another journal or other publisher should not be submitted. The submitting author will be asked to verify this during the web-based submission process.
3. For manuscripts that report on field surveys or experiments: Please ensure that reporting descriptive statistics, models, and tests of hypotheses is complete. For experimental papers, this would generally include: (1) reporting standard deviation and cell sizes in any tables of means; (2) including degrees of freedom along with any reported test statistics that have degrees of freedom, whether in the tables, footnotes, or text; and (3) ensuring ANOVA, MANOVA, ANCOVA, etc. tables are complete, including all estimated terms, including the error term, along with the associated degrees of freedom. Note that if test statistics and associated degrees of freedom are reported in the tables, then authors need not repeat this material in the text. For example, authors could provide only the p-values for effects (tests) of interest in the text, if desired. If the additional documentation (e.g., questionnaire, case, interview schedule) is sent as a separate file, then all information that might identify the author(s) must be deleted from the instrument.
4. Manuscripts that report experiments utilizing human subjects must verify approval by the institution at which the experiment took place. Notation of approval should be made within the

manuscript. In addition, the submitting author will be asked to verify approval during the web-based submission process.

5. Authors are responsible for recognizing and disclosing any conflict of interest that could be perceived to bias their work. Conflict of interest disclosures include, but are not limited to, grants or research funding, employment, affiliations, honoraria, stock options/ownership, royalties, consultancies, inventions, and patents. Authors will be asked to provide any potential conflicts of interest during manuscript submission.
6. There is no submission fee for JETA.
7. Revisions should be submitted within 12 months from the request, otherwise they will be considered new submissions.

REVIEW PROCESS

The review process consists of the following:

1. The editor reviews the submitted manuscript for proper format and consistency with the mission of the journal. The author(s) is notified if the manuscript is deemed inappropriate for further consideration.
2. Manuscripts that pass the initial review are sent to an associate editor and a minimum of two reviewers for formal review.
3. The editor evaluates comments and recommendations of the reviewers and the associate editor and informs the author(s) of the decision regarding the publication of the manuscript (reject, accept, or revise/resubmit). The editor's decision and comments, without identifying information, are forwarded to the associate editor and reviewers.
4. Requested revisions are returned to the same reviewers. In addition to the revised manuscript, the author(s) should submit responses to the reviewer comments that restate the comments and identify how and where the comment is addressed in the revision.
5. The process will continue as described above until a final publication decision is made.
6. Consistent with our Publications Ethics policy on plagiarism (for the full version, please see: <http://aaahq.org/Portals/0/documents/about/Policies&ProceduresManual/PlagiarismPolicy.pdf>), all articles are automatically processed through CrossCheck prior to publication to identify text taken from published and unpublished works, print or digital, that is not properly cited or quoted.

The review, as outlined above, is an overview of the actual process. The editor may, in some circumstances, vary this process at his or her discretion. Through its constructive and responsive editorial procedures, the journal aims to render research efforts relevant and rewarding for all concerned.

ADDITIONAL INFORMATION

Teaching Notes are only available to full-member subscribers of JETA through the electronic publications system of the American Accounting Association and will not be printed in this journal (see <http://aaajournals.org/loi/tjnt>). This section should include the solutions to the case, including supporting calculations and likely student responses to the case. In addition, this section should include suggested grading rubrics or other assessment material. Authors are encouraged to submit databases, electronic spreadsheet files (and solutions), and presentation software files (such as Microsoft PowerPoint files) that would enhance the case. These files will be included on the subscriber website and will not be available to students.
