

CALL FOR PAPERS

*Innovations in Digital Health,
Diagnostics, and Biomarkers*

“Digital Healthcare Innovations During a Pandemic”

Innovations in Digital Health, Diagnostics, and Biomarkers (IDDB) is seeking articles that share innovative uses of digital health that may have impacted the response to COVID-19. For example, topics for consideration include:

- Examples of diagnostic tools or tests introduced during the pandemic and adopted into routine healthcare
- Technology-based changes in healthcare delivery
- Impact of policy and health economics on innovations in this field
- How have digital health needs changed because of the pandemic?
- Describe the impact of digital health on research and/or patient care during the pandemic and beyond
- Strategies for preparedness within digital healthcare systems

Original research, brief communications, reviews, case studies, guidelines, letters, editorials, and commentary articles are welcome.

**For more information and to submit your article,
go to IDDBJournal.org**

About the Journal

IDDB seeks contributions from authors around the world, covering all types of disease, in the form of original research, reviews, case reports, and more. The Journal aims to serve as a platform for timely dissemination of the latest innovations in digital health, diagnostics, and biomarkers, including studies of biological and non-biological “biomarkers.”
