CALL FOR PAPERS

Innovations in Surgery and Interventional Medicine (ISIM) aims to serve as a platform for timely dissemination of the latest innovations in the field of surgery and interventional therapy. The Journal Editors are seeking manuscripts from authors around the world, covering all types of disease, in the form of original research, reviews, case reports, and more.

Topics that will be covered in the Journal are as follows:

Innovations in Surgery:

- Robotics and minimally invasive surgery
- Novel surgical techniques
- Updates in surgical management
- Audit and quality of surgical procedures

Innovations in Interventional Medicine:

- Interventional radiology
- Minimally invasive procedures
- Non-surgical intervention

And more:

- New devices
- New technologies
- New techniques

All manuscripts must be submitted online to be considered for peer review and potential publication in the Journal. Please visit the Journal website for instructions:
