CALL FOR PAPERS

Innovations in Surgery and Interventional Medicine (ISIM) aims to serve as a platform for timely dissemination of the latest innovations in the field of surgery and interventional therapy. The Journal Editors are seeking manuscripts from authors around the world, covering all types of disease, in the form of research articles, reviews, technical notes, case reports, images, and more. **All manuscripts must have an element of innovation.**

Topics to be considered are as follows:

- Robotics and minimally invasive surgery
- Novel surgical techniques, procedures, and protocols
- Updates in surgical management (pre and post op)
- Safety and quality of surgical procedures
- Non-surgical interventions
- Interventional radiology, endoscopy, pulmonology
- Combined techniques, i.e., surgery/radiology, endoscopy/pulmonology
- Navigation systems, i.e., imaging modalities for guidance and related devices
- Basic and translational studies with imaging including functional imaging
- Value-based interventional procedures
- Cost-effectiveness studies

Please visit the Journal website to submit a paper: isimjournal.org.

All manuscripts must be submitted online to be considered for peer review and potential publication in the Journal.

If you have any questions about the Journal, feel free to check the website or contact the editorial office directly at editor@innovationsjournals.com.
