

CrossCheck Information Page

CrossCheck is a multi-publisher initiative to screen published and submitted content for originality. The Journal of Wildlife Diseases uses the iThenticate software to detect instances of overlapping and similar text in submitted manuscripts. Wherever you see the “CrossCheck Deposited” or “CrossCheck Depositor” logos, you can be reassured that the publisher whose content you are reading is committed to actively

combating plagiarism and publishing original research. To find out more about CrossCheck visit <http://www.crossref.org/crosscheck.html>.
