G6PDS-B 2019 Supplemental Questions

- 1. Has your laboratory received any questions from clinicians regarding what the average normal G6PD activity is for your assay and patient population?**
 - Yes
 - No
 - Do not know

- 2. Has your laboratory ever determined what the average normal G6PD activity is for your assay and patient population?**
 - Yes
 - No
 - Do not know

- 3. Do you currently report patient G6PD results as a percent of normal G6PD activity?**
 - Yes
 - No
 - Do not know

G6PDS-B 2020 Supplemental Questions

The following questions are provided to look at the spectrum of reference intervals used across methods in *quantitative* glucose-6-phosphate dehydrogenase (G6PD) activity reporting. Please specify your laboratory's reference interval for G6PD activity when performing quantitative testing.

1. What are the G6PD activity units reported by your laboratory?

- U/g Hb
- U/10E12 RBC
- IU/min
- U/dL
- Other, specify: _____

2. Provide the G6PD activity reference interval used by your laboratory. (*Note:* Use the applicable format based on how results are reported at your facility and the units indicated in the question above.)

- _____ to _____
- Greater than _____
- Greater than or equal to _____
- _____ \pm _____
- No reference intervals provided for G6PD activity results
- Other, specify

3. Does your laboratory also conduct "percent of average normal G6PD activity" reporting?

- Yes (Proceed to Question #4)
- No (Stop)
- Do not know (Stop)

4. If your laboratory conducts "percent of average normal G6PD activity" reporting, provide the reference interval used with these percentage-based results. (*Note:* Use the applicable format based on how results are reported at your facility; all choices below relate to units of "%".)

- _____ to _____
- Greater than _____
- Greater than or equal to _____
- _____ ± _____
- No reference intervals provided for "percent of average normal G6PD activity results"
- Other, specify
